

# The latest must-have kit

## 1 Paramedic Pro – Ikanos Consulting

[www.ikanosconsulting.com/products](http://www.ikanosconsulting.com/products)

The Paramedic Pro medical application from Ikanos Consulting, which runs on the Golden-i wearable headset computer (pictured), allows healthcare workers to access and record vital information quickly on their Golden-i headsets – completely hands-free. Paramedic Pro provides video chat, audio recording and access to information at the point of care. With its built-in camera, Golden-i enables direct video communication between field medical staff and A&E, so experts at a hospital can assess a situation and provide timely advice. Paramedics can talk to colleagues using the headset's video chat capabilities, and provide information to doctors so they can prepare for the patients' arrival. The application provides a standardised way to communicate data such as an estimated time of arrival (ETA) back to the hospital, and for staff on the scene to view the patient's medical records. It also enables medical staff to view maps and use GPS to track their location. Consulting has also announced two other applications: Firefighter Pro and Police Pro.

## 2 TWISTER sole – Vibram®

[www.vibram.com](http://www.vibram.com)

Vibram® fireproof soles combine highly effective design and highly flame-resistant compounds. These soles enable firefighters to tackle fire, flames and water while counting on greater safety conditions. The Vibram® TWISTER sole is based on the new Vibram® SUPERWORK compound, developed to increase the antistatic properties and oil and flame resistance. The TWISTER is a box section sole, specially created for safety at work. It features: double density rubber, for better performance and greater comfort; wide contact surfaces with self-cleaning channels to keep the sole free of oil and residues; anti-slip grooves in the waist for maximum safety on steps; and two-colour construction on the tread and the laterals.

## 3 Motorcycle Suit – Bristol Uniforms

[www.bristoluniforms.co.uk](http://www.bristoluniforms.co.uk)

Bristol has designed firefighter PPE for use by members of fire crews using motorcycles. In what is believed to be a first, Bristol has designed protective clothing, which not only meets the road safety requirements for professional motorcyclists but also the highest European level for structural fire fighting. The new coat and trouser combination is a product of Bristol's New Product Development Programme (BNPDP). The coat and trouser have been ergonomically designed to ensure ultimate fit, suitable for riding motorcycles and fire fighting duties. They are designed to be zipped together and are available in 28 sizes, both male and female. The ensemble is machine washable after the back, shoulder, elbow, hip and knee protectors have been removed.

## 4 B300 rugged laptop – Getac UK

[www.getac.co.uk](http://www.getac.co.uk)

One of the industry's favourite rugged laptops – the Getac B300 – now runs faster than ever before, with twice the graphics capabilities of the previous generation B300. Powered by the latest third Generation Intel® Core™ i5 or i7 processor, the B300 incorporates Intel® vPro™ technology and offers operators a 67 percent increase in speed; an integrated Intel® HD Graphics 4000 card delivers rapid access to high-performance graphics, greatly improving display imagery, intricate mapping and advanced video streaming.

## 5 Z-Rex – Leatherman

[www.whitbyandco.co.uk](http://www.whitbyandco.co.uk)

Distributed in the UK by Whitby & Co the Z-Rex is the first tool that combines glass breaking, strap cutting and wrench tools in one, lightweight and easy-to-use tool. The stainless steel 440C V notch cutters are hard wearing, easily replaced and can even be flipped over for a fresh edge when it's needed on the spot. Tungsten Carbide makes the glass breaker tool a force to be reckoned with – needing less force than steel breakers, the Z-Rex is perfect when you need to break through glass with one quick strike. The oxygen tank wrench and hex wrench are built into the lightweight aluminium body, which is moulded with an ergonomic grip and features a finger hole for comfort and ease of use. The Z-Rex is designed and made in the US by the Leatherman company and comes with a 'no quibbles' 25-year guarantee.
